# MATERIAL

FabBRICK is a unique and innovative material made from recycled textiles.

This responsible material is also high-performance:

- **Acoustic absorber**
- **Thermal insulation**
- **Non-flammable**
- **Mechanical strength**

# HISTORY

FabBRICK was invented in 2017 by Clarisse Merlet at architecture school.

Two years later, she patented this innovative material in France and Europe.

Today, as Artistic Director of the brand, she and her team have been able to develop the brand in line with the various artistic projects they have carried out.
